MADYN

Two year old Madyn Frazier was diagnosed with high risk Acute Lymphoblastic Leukemia (A.L.L.) on June 3, 2011. Childhood A.L.L. is a cancer of the blood and bone marrow. This type of cancer usually gets worse quickly if it is not treated. It is the most common type of cancer in children.

Madyn is currently receiving her treatments through Children's Hospital of Central California. Her treatments will last approximately two and a half years. For a two year old, that is an especially long time to endure anything! Through this difficult time, her family is so appreciative of the continuous support from friends, family, and even strangers.
